

ASP FACTS

PRODUCT: Duty Scabbard

ADVANTAGE:

Laminated construction of the Duty Series provides a soft scabbard that is well suited to both plainclothes and security use. A sophisticated design technology forms the foundation of this clean, simple case. The elastic side wall construction provides secure retention and a smooth presentation.

An elliptical cutout retains retracted batons while accepting expanded shafts. The carrier is equally well suited to Triad® Lights (2, 3, 4) or ASP Expandable Batons (16, 21, 26). Cases are also available for Tungsten® Lights (1, 2).

SPECIFICATION:

- Laminated construction
- Elastic side walls
- Elliptical bottom hole
- Belt loop
- One direction snap
- Accepts belts to 2.25"

PERFORMANCE:

The soft, low profile appearance of the Duty Scabbard is equally well suited to investigative or uniform personnel. The case secures an ASP Baton or Triad Light while facilitating rapid presentation.

SALES STRATEGY:

Demonstrate the secure retention of a Tactical Baton® or Triad Light. Explain the flexibility of the elastic side walls. Show how the elliptical bottom hole retains a retracted tip while accepting expanded shafts.
