

ASP FACTS

FEATURE: Triad® Elite Reflector

ADVANTAGE:

The three independent focusing elements of the Triad Reflector create a room filling halo of light as well as a penetrating central beam of incredible brightness. Both flood and spot illumination are achieved simultaneously. This tactical breakthrough provides the officer with the ability to light up an entire room with a halo of general light while simultaneously providing a long range central beam capable of determining the threat potential of a subject.

SPECIFICATION:

- Three independent elements
- Pre-focused
- Parabolic reflectors
- Mirror polished
- Vacuum metalized surface
- Proprietary beam output
- Room filling halo
- Penetrating central spot

PERFORMANCE:

The Triad Reflector provides an officer with two essential lighting profiles in one extremely compact format. The reflector delivers a room filling halo of brilliant white light that provides general illumination. It simultaneously projects a blinding central beam of incredible brightness. The three pre-focused independent elements of the Triad Reflector produce the best possible tactical illumination.

SALES STRATEGY:

Select a large dark room. Demonstrate the brilliant white illumination of the Triad. Explain the tactical advantages of a room filling halo of light combined with a penetrating central beam.
