

ASP FACTS

PRODUCT: Hinge Handcuffs

Hinge Handcuffs employ a rivetless link for added security.

Hinge Handcuffs provide more restricted control of large subjects.

Tactical Handcuffs combine polymer construction with a four point rivetless exterior hinge design.

ADVANTAGE:

Hinge Handcuffs provide more restricted control of subjects. The four point design of ASP Tactical Handcuffs™ allows them to lay flat on the belt. The rivetless exterior links are clean and strong.

SPECIFICATION:

- One piece unitized frame
- Stainless steel
- Reinforcing ribs
- Hardened
- Flex Frame Technology
- Rivetless exterior
- Four point construction
- Stainless steel construction
- Lay flat design
- Computer engineered
- Unitized construction
- Tapered cheek plates
- Frame interlock
- Pierced bow guides
- Polymer overmold
- Permanent color
- Custom colors
- Agency identification
- Security level
- Lightweight
- Double keyway
- Colored double lock indicator
- Replaceable Lock Set
- High contact bow
- Conical bow
- Greater range of adjustment
- Radiused edges
- Smooth ratchet action
- Single direction unlock (single and double lock)
- Recessed keyway
- Beveled double lock
- Complies with NIJ Standard 0307.01

PERFORMANCE:

No other hinge design combines stainless steel links with a four point lay flat design. The overmolded stainless steel frame is exceptionally strong and has smooth, radiused edges.

SALES STRATEGY:

Demonstrate the smooth action, clean appearance and four point lay flat design of Tactical Hinge Handcuffs.
